MORE INFORMATION.

This STEAM opportunity is a student led challenge to complete eight mission objectives (MO) based on real NASA missions to the planet Venus. Teams completing the MO travel to Central Washington University for the final challenge.

Rover Observations and Discoveries in Space (ROADS) offers exploratory learning, leadership development, insight to the technologies employed in space exploration and creative expression in a fun team building environment.

Duration: 14 weeks January 20 – May 2, 2026

Location: Mondays, Online; Thursdays and some Saturdays,
Boeing Field (KBFI), Tukwila, WA
